

IYEME SALUBI

DATA ENGINEER

Wolverhampton, United Kingdom | +44 7983 396158 | iyemeaji@yahoo.com | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Engineer with hands-on experience designing, building and supporting scalable batch and real-time data pipelines across Microsoft Fabric, Azure and Google Cloud. Skilled in Python, SQL, PySpark, ETL/ELT, data modelling, orchestration, data quality and cloud-based data platforms, with practical experience using Fabric Lakehouse, Azure Data Factory, Airflow, Kafka, Spark, Snowflake, dbt and BigQuery. Experienced in developing Bronze/Silver/Gold Lakehouse architectures, automating ingestion and transformation workflows, troubleshooting pipeline and data-quality issues, and producing reliable analytical datasets and Power BI reporting layers. Strong software-engineering foundation in Git/GitHub, APIs, CI/CD, testing, documentation and Infrastructure as Code with Terraform, with experience translating business requirements into maintainable, production-ready data solutions.

TECHNICAL SKILLS

Data Engineering: Microsoft Fabric, Lakehouse, Data Pipelines, Medallion Architecture (Bronze/Silver/Gold), PySpark, Spark Structured Streaming, ETL/ELT, data cleaning, validation, dimensional/reporting outputs

Cloud & Storage: Microsoft Azure, Azure Storage / ADLS Gen2, Azure Data Factory, Google Cloud, Cloud Storage, Cloud Run, BigQuery, Snowflake

Languages & Data: Python, SQL, PySpark, PostgreSQL, SQLite, JSON, CSV, Parquet; JavaScript/jQuery, HTML/CSS

Orchestration & DevOps: Apache Airflow (Astro), dbt, Kafka, Docker, Terraform, Git/GitHub, GitHub Actions

Analytics: Power BI, Microsoft Fabric semantic models, KPI cards and reporting

PROFESSIONAL EXPERIENCE

Mar 2026 - Present **Data Engineer**

AMDARI - United Kingdom

- Design, build and maintain scalable data pipelines for ingesting, transforming and integrating customer, sales and operational data into reliable analytical datasets.
- Develop ETL/ELT workflows using Python, SQL and PySpark, including data cleansing, multi-table joins, aggregation, validation and transformation of structured data.
- Build batch and automated data-processing workflows, improving data consistency, reducing manual processing and supporting dependable downstream reporting.
- Apply data-quality checks, reconciliation and validation controls to identify source-data issues and maintain accurate, trusted datasets.
- Design reporting-ready datasets and data models to support analytics, KPI reporting and business decision-making.
- Troubleshoot pipeline failures, data-quality issues and processing errors, identifying root causes and implementing maintainable fixes.
- Use Git/GitHub, CI/CD practices, testing and technical documentation to support version-controlled, reproducible and maintainable data engineering workflows.
- Collaborate with stakeholders to translate business and reporting requirements into scalable data solutions.

Dec 2022 - Jan 2026 **Systems Architecture Engineer**

Sterlyn IT - United Kingdom

- Designed and developed cloud-based data and application solutions across Azure, Microsoft Fabric and Google Cloud, supporting scalable batch and real-time data processing workloads.
- Used Terraform Infrastructure as Code (IaC) to provision and manage cloud infrastructure consistently and efficiently.
- Designed and developed applications in Python/Django and JavaScript, building reusable backend components that sped up delivery of new features.
- Worked with SQL and relational databases to ensure robust data storage, querying, validation and processing for production applications.
- Built and integrated APIs that enabled reliable data exchange between applications and services.

- Reviewed and refined system architecture decisions with the wider engineering team, improving overall application reliability.
- Applied Git/GitHub, structured testing and debugging, and produced technical documentation to deliver maintainable, production-ready software.
- Supported deployment and troubleshooting of production systems, minimising downtime and service disruption.

Dec 2013 - Mar 2021 Senior CT/MRI Radiographer
Alliance Medical - United Kingdom

- Led scanner-site setup projects across NHS environments and delivered CT/MRI examinations within safety-critical clinical workflows.
- Carried out equipment QA testing and maintained accurate documentation, upholding rigorous clinical and operational standards.
- Mentored newly qualified graduates, supporting their development and consistent clinical quality across the team.
- Coordinated with multidisciplinary clinical teams to ensure safe, efficient patient throughput in high-pressure environments.
- Promoted to Senior Radiographer in recognition of leadership, reliability and operational performance.

EDUCATION & CERTIFICATIONS

Jun 2025 - Jan 2026	ETL and Data Pipelines with Shell, Airflow and Kafka <i>IBM</i>
Jun 2025 - Jan 2026	Full Stack Software Developer <i>Code Institute, Ireland</i>
Jan 2022 - Jul 2022	Front-End Developer Professional Certificate <i>IBM</i>
Sep 2011 - Feb 2013	MSc Applying Radiographic Practice <i>Sheffield Hallam University, United Kingdom</i>
Sep 2002 - Feb 2008	BSc Radiography <i>University of Calabar, Nigeria</i>
